Indoor bean bags

Our indoor bean bags can be used outdoors such as in a garden or terrace.
However, all contact with water should be avoided, they were not designed to get wet.

Pool Party Floating Tray

(only available by order)

The essential accessory for your pool party is available. Pour yourself another drink while staying on the water with our Floating Tray, the most helpful bean bag in the family!

Pool Party Floating Tray

Advices and maintenance

All our bean bags are easily washable. The cover of our bean bags can be easily removed. You can opt for cleaning by hand or by machine at 30° with a mild detergent. AVOID ALL AGGRESSIVE DETERGANTS.

Our bean bags are very comfortable, thanks to our polystyrene beads. The balls are easily replaceable if you notice any sagging after several years of use. By filling the bean bag about 75%, it will be fluffy. The more you fill it, the firmer the bean bag will be.

Our Outdoor and floating bean bags are water and chlorine resistant. We still recommend that you rinse your bean bags with clean water after use in a swimming pool or at the sea.

Our bean bags are equipped with a resistant zip concealed in the cover to guarantee the safety of the little ones. Indeed, the polystyrene balls are sealed in an under-cover to prevent any leakage.

Soo Santai bean bags are designed to be resistant to the sun and thus prevent any discoloration. We still recommend that you store your bean bags in a dry and covered place to allow them a longer life.

Only our "floating" bean bags are able to float on water, whether at sea or in a swimming pool. Other Soo Santai products will not float, as they do not have the necessary coating to be able to float.
